Table 1: IT systems and the processes they support

System	Supports	What it does there
Platform Store & Payment Gateway	EPC 1	Takes payments and confirms game access purchases
In-Game Marketplace	EPC 2	Handles listings, trades and marketplace fees
CRM	EPC 3	Stores player profiles, tickets and custom-order requests
Game Server & AI NPC Engine	EPC 4	Runs the released content and adaptive NPCs
BPMS	EPC 1 to 4	Orchestrates the process steps and tasks
ERP	EPC 1 to 3	Records sales, fees, payments and payroll
KM	EPC 3 and 4	Holds design knowledge and guidelines
Moderation & Anti-Cheat	Supports EPC 4 (safety)	Handles abuse reports and cheat alerts
Forum / Discord Platform	Forum events (Process 4)	Handles posts, feedback and event sign-ups

Table 2: KPIs (part 1)

#	KPI	Type	Definition	Goal	Target
1	Monthly recurring revenue	Lagging	Total game sales and marketplace fee revenue per month	Goal 4	$50,000 within year 1
2	Positive Steam review share	Lagging	Percentage of Steam reviews that are positive	Goal 9	≥85% by Dec 31, 2027
3	30-day player retention	Lagging	Percentage of new players still active 30 days after joining	Goal 5	≥20% by Oct 1, 2026
4	Server uptime	Lagging	Percentage of time the game servers are available	Goal 11	≥99.9% by Dec 31, 2027
5	Payment failure rate	Leading	Failed payments divided by payment attempts, per day	Goal 4	<5%
6	Weekly active forum/Discord members	Leading	Unique members active in the forum or Discord per week	Goal 2	Grow toward 25,000
7	Abuse reports resolved within 24h	Leading	Percentage of abuse reports closed within 24 hours	Goal 10	≥95%
8	First-pass test rate	Leading	Percentage of candidate versions that	Goal 6	≥80%

#	KPI	Type	Definition	Goal	Target
			pass testing the first time		

Table 3: KPIs (part 2)

#	Business process activity measured	Data source	Feeds the dashboard via
1	EPC 1: Grant access and record sale	Platform Store & Payment Gateway, ERP	ETL → Data warehouse
2	EPC 4: Approve and deploy version	Platform Providers (Steam reviews)	ETL → Data warehouse
3	EPC 4: Approve and deploy version	Game Server & AI NPC Engine	ETL → Data warehouse
4	Server maintenance (Process 3)	Game Server & AI NPC Engine	EAI (real time)
5	EPC 1: Request payment	Platform Store & Payment Gateway	EAI (real time)
6	Forum community events (Process 4)	Forum / Discord Platform	EAI (real time)
7	Moderation of player behaviour	Moderation & Anti-Cheat	EAI (real time)
8	EPC 4: Test safety, fairness and performance	BPMS	EAI (real time)
